HY-YD

Single-use Flexible Electronic Choledochoscope

HY-YD3.9, HY-YD-4.5, HY-YD5.3

Application

Used in conjunction with the electronic endoscope image processor produced by our company. It is inserted into the biliary tract through the mouth and esophagus, and is used for observation, diagnosis, photography and treatment of the biliary tract.

Configuration

This product is a disposable handheld flexible electronic endoscope. The operating part is designed in accordance with ergonomics. It can take pictures, record videos, and switch freely. The whole machine is a disposable design, which effectively prevents cross infection.
